Time for Clean Energy ETFs?

Ownership of renewable energy stocks is extremely crowded, per the index provider MSCI. President Biden has expansionary plans for clean energy. He has a plan — a Clean Energy Revolution — to address the issue of climate emergency. He sees America as becoming a 100% clean energy economy by 2035 and having net zero emission by 2050.

....

Investors [intend to double their allocations](#) to sustainable products over the next five years, per BlackRock and 20% said that the pandemic has actually brought their sustainable investing allocations on the fast-track mode.

....

Here are a few clean energy ETFs that gives you exposure to the segment.

ETFs in Focus

....

Invesco Global Clean Energy ETF [PBD](#) –
